# Law Makers End Two-Year Reorganization Battle

-The House today climaxed a two year fight over government Congressional action on a greatly modified bill giving President Roosevelt power to shift and realign executive agencies.

The bill now goes to President Roosevelt for signature. It permit him to issue reorganization orders which would become effective unless both houses disapproved them in 60

When the House acted on the final draft of the bill, Rep. John Taber, R., N. Y., said that because of its prohibition against abolition of any government functions, the bill would only 'increase overhead and decrease efficiency." He voted against it.

"Rearrange Flowers"
Rep. Everett Dirksen, R., Ill., said that modifications in the measure since the House defeated the original bill last year made it virtually meaningless.
"The bill," he said, "is an

authorization to rearrange the flowers in the governmental vase, but no flowers shall be removed, even though a bit droopy."

The bill gives the President six administrative assistants at

Prison Teacher

In a one-room schoolhouse on McNeill's Island, in Puget Sound near Tacoma, Wash., Esther Blandau teaches 33 children whose parents are members of the Federal penitentiary staff. The schoolhouse is surrounded by prison buildings.

CHICAGO, March 29.—(UP)— Arizona pays the highest teacher salaries in the 20 states covered by the North Central Association of Colleges and Secondary Schools and North Dakota pays the least,

the 44th annual convention of the association heard today. Arizona pays an average of \$1923 a year to men and \$1823 to women high school teachers. North Dakota's salary scale averages \$1245 for men and \$985 for

**Enrollment Jumps** 

The commission on secondary schools also noted increased high school enrollment, a tendency to ncrease the number of pupils per teacher, and lengthening of classroom periods to as long as 75 minutes, in its report on 2813 affiliated high schools at the opening session of the four-day meet-

Enrollment in the 20 states increased from 1,492,962 in the 1937-38 school year to 1,601,011 in the present term, the commission reported. It was a continuation of a four-year rise for high schools which has paralleled a drop in elementary schools due to declining birth rates and immigration

# Market-Places in type

Think of a great market-place where farmers, merchants, clothiers. caterers stand and solicit your trade. All who make the clothes you wear, the furniture and draperies for your house, the medicines that keep you well, eagerly seek the chance to tell you of their wares.

Such, in effect, is the newspaper. Here, in a great marketplace, set in type, manufacturers whose names you know ask for your patronage. By printed word, they tell you why this brand of corn flakes is superior . . . why this maple corner-cupboard is worth more than is asked . . . why the desk, the motor car, the life insurance, the book will add to your joy of living.

Heed the advertisements well. They have a message that will save you money, conserve your time and patience, richly reward you and your family.

It takes more than "just a salve" to bring speedy relief. It takes a "counter-irritant" like good old soothing, warming Musterole to penetrate the surface skin and help to quickly relieve the painful local congestion and aches due to colds.

Muscular lumbago, soreness and stiffness generally yield promptly.

Better than the old-fashioned mustard plaster. Musterole has been used by millions for 30 years. Recommended by many doctors and nurses. In three strengths: Regular, Children's (mild) and Extra Strong, 40%. All druggists.

campaign of the Orange County Tuberculosis and Health association to catch the "white plague" in its early sages while it is comparatively easy to cure, Mayor Fred C. Rowland today issued a public endorsement of the cam-

In speaking of the campaign the mayor said: "This campaign is a praiseworthy effort on the part of medical scientists and other leaders to make our city a safer, healtiher place in which to live.

"We are asked to 'help find arly tuberculosis.' Tuberculosis rarely makes its presence known until it has made substaintial headway. For this reason it is upon apparently healthy groups that the searchlight must be thrown.

therefore appeal to Santa Ana's leaders to give full support to every phase of the drive. I urge our school authorities, our business and industrial leaders, our clergymen, in short, all who lead in some aspect to our community life to cooperate in bringing about a difficult, but not impossible goal—the eradication of tuberculosis."

# A- HOPE FOR LAGUNA POLICE AREA LOST

trict at South Laguna were dropped by the county supervisors following a brief hearing late yesterday, at which a petition of protest was before the board.

This petition here So a size of the general theme "The Present Tay Diana". In. tomorrow.

The conference itself begins at 10:30 sharp, with Mayor Fred Rowland, of Santa Ana, extending welcoming remarks to the group, assembled to hear discussion of the general theme "The Present Tay Diana".

This petition bore 86 signatures, exactly the number of signatures contained on the original petition asking that the district be formed. The protest pe-

Lindberg, Chrysler Corporation color doubtful as to the future and more perfect that the order that the considerably lower than the perfect that the order than the perfect that the perfect engineer, to the effect that the public buys a larger percentage ent, black gets a larger play, he very big year of 1937.

# What New Luxury Is a GAS SAVER too?

WHAT car leads the value parade for 1939? That's a question shrewd buyers are asking today. And they're listening and learning what car is most talked-about for beauty, for luxury, for new ideas—and for economy.

Maybe you know the answer. But if you don't,

we simply point to the new 1939 Dodge and say: "Take a Look-that's all Dodge asks!"

### Money-Saving Engine!

Take a look at every part of this great new car—but, most important of all, take a look at its famous engine. Here is a power plant that not only gives you all the proven gas- and oil-saving features that have won for Dodge a nation-wide reputation for economy but offers, for 1939, new engineering advancements for even more efficient operation! Remember, too, that Dodge Dependability means even greater economy in longer life and freedom from repair!

Then take a look at the price tag. Here's

where you'll get your biggest money-saving sur-prise—for this big Luxury Liner is actually priced even lower than last year's Dodge! Check the figures and you'll be amazed at what a small difference there is between Dodge prices and those of the leading low-priced cars!

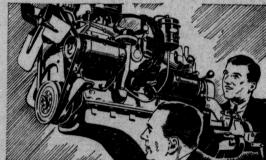

Tune in on the Major Bowes Original Amateur Hour, Columbia Network, Thursdays, 9 to 10 P. M., E. S. T.

GOOD NEWS FOR USED CAR BUYERS!

Now you can get a Dodge used car which, in many ways, is just as modern as many competitive-make 1939 new cars—and get it for only a fraction of the cost! Here's why: there's such a great demand for the new 1939 Dodge that buyers are actually turning in fine late model Dodge cars way ahead of time! And these cars, still "youngsters" in mileage and looks, are being sold by Dodge dealers at amazingly low prices! What's more, the demand for the new 1939 Dodge by owners of other makes of cars is giving your Dodge dealer one of the finest assortments of all makes and models of used cars in your locality! See your nearby Dodge dealer today!

"H" pattern—nothing new to learn! Not an "attachment," but an integral part of the car. Floor is clear for real comfort for three in front seat!

TAKE A LOOK! New Dodge Engine - powerful, dependable - with all the proven money-saving fea-tures which have won for Dodge a nation-wide reputation for economy, plus new advances which give even more efficient operation!

TAKE A LOOK! "Tea for Two" is easily possible in this new 27% larger Dodge luggage compartment!
Unlike old "trunk style" compartments, it's invisible—
completely concealed beneath graceful lines of windstreamed rear ensemble!

Production has been doubled on the new 1939 Pontiac station wagon model, according to C. G. Riley, zone manager for the Pontiac division of General Motors.

"Just recently announced, the new car is meeting with such public approval that our company was forced to increase output in order to fill the demand," declared

The new car is built on the 115 de luxe chassis and easily accomodates eight pasengers, including driver. It also provides unusually large luggage space. Two rear seats are removed when necessary to provide loading space. The rear tail gate swings open to provide extra large baggage. As another convenience, the rear seat may be moved forward to the position regularly held by the center seat, thus providing seating space for six passengers and leaving ample room for luggage. "Many private individuals are addings station wagons to their automobile equipment," sail Riley "In addition, our rapidly growing owner list includes resorts, dude ranches, country clubs, estates, schools and college fraternities and sororities. As an outing car, the new Pontiac is an ideal vehicle.

quality personal transportation." Perfect examples of streamlined bodies are raindrops.

Possessing as it does passenger-

car comfort features, it provides

FOURTH AND BUSH

As a matter of inside fact, the Garner boom is proceeding like that moving mountain in California. It might be a landslide. It might be stopped.

States from which Mr. Garner's friends may well expect to present Alabama delegates include: (after the first ballot), Colorado, Georgia, Illinois (about half, perhaps), Maryland, Massachusetts (about half). Mississippi, Nebras-ka, Ohio (about half), Oklahoma, Pennsylvania (exactly half), South Carolina, South Dakota, Texas, Virginia (after the first ballot), Wisconsin, Wyoming, Hawaii. From these a maximum of 408 can now be conjured.

In addition his friend, Senator Bennett Clark, may reasonably look forward to Missouri with 30, possibly also with hope to Nebraska (14), Kansas (18), and Iowa (22) for a total of 84.

Together Garner and Clark would come close to a simple majority, but the deciding doubt would lie in what Mr. Farley does with roughly 150 doubtful 400 Skaters Plan delegates who might be guided by his wishes and the 500 (very roughly) Roosevelt delegates

HOLLYWOOD, March 29.-I'm taking time out for an in-thesleeve chuckle this morning-one that has been generating for about five years. It's been that long since Hollywood had a chance to capitalize on one of the best star prospects that ever stepped before a camera—a beautiful young singer named Kitty Carlisle. Hollywood muffed the opportunity and for a particularly reason if the argument advanced the one studio big-shot who discussed her with me then can be taken as a criterion. He claimed that Kitty was "too different"that she was hard to cast. In Kitty has ARRIVED. to the Hollywood mould.

### ALMOST UNLIMITED POWER

The nerve of the backers of the C.I.O. seems unlimited. They are backing Assembly Bill 1926, which would prorate oil production in the State of California. This bill would be administered by three political appointees at \$8000 per year. These administrators would be responsible to the C.I.O.

If this bill can be put over it would simply mean that every oil company in California would be absolutely at the mercy of the C.I.O. If it did not do what the C.I.O. wanted, its output would be curtailed. The oil company very soon would be eliminated from business which did not completely unionize and its employees all pay dues to the

This bill certainly would be a fascist form of government controlled by the heads of the C.I.O.

### SCIENCE SHOUTS

Science has been speaking for some time, but been developed to make tough beefsteak tender, it shouts. This is one time that science has said

while they benefit the average man indirectly, are too remote for him to see just where they come in. But this one, getting right down to the evening dinner table, will cause a swelling chorus from 40,000,000 dinner tables: "Good old science!"

Three years of research by the Mellon Institute went into this discovery. Maybe, after many years, Andrew Mellon will be remembered not as secretary of the treasury but as the man who took the beefs out of beefsteak.

The result is a tremendous increase in the shipment of perishables punishment is the best protection ever devised busy exploring the possibility of light again was on the rampage. level of lower mediocrity with proin turn, means more money in the pockets of the

We'd expect a prosperous industry to go ahead like this. The amazing part of the railroads' several years when they sustained heavy deficits, they've gone on, giving traveler and shipper more and more for their money. No industry has done a finer job of serving the public whose economic life depends on rail transportation. Think what progress the country could have if Congress actually passed laws giving the lines a fair regulatory break. It's a safe bet that then the industry would do things that would make even their tremendous achievements of the past seem small by comparison.

### NATURAL SELECTION AND HUMAN DESIGN\*

(Antioch Notes by Arthur Morgan) Competition is essential to organic evolution. Nature seems to feel her way blindly, trying many forms, rejecting most, retaining occasional favorable variations. For this trial and error process, more individuals must be born than can survive, so that competition or other test can select the

Human civilization is accelerated by replacing trial and error with test and design; yet that process is partly frustrated by the limited wisdom and character of men.

### Mutation Is Heterogeneous

An animal never is exactly like either parent.

changes would be toward deterioration, but for the fact that harmful changes tend to be eliminated prize horses very vulnerable. The technical specialthrough innate inability to survive, or by competition with more effective types.

Where less effective forms are not eliminated, deterioration does take place. Insects and fishes living many generations in caves tend to become blind, apparently through gradual accumulation of random changes in eye structure. Similar random changes take place in the eyes of animals which live in sunlight, but they tend to be eliminated by ever-present enemies, while mutations which hap-

pen to result in better vision help to survival. Mutations, apparently random, appear in all human offspring. If any population for a long period should have just enough offspring to replace the parents, and if all should live and breed, gradual ation would result. Only with more offring than necessary to replace parents, and with opping out of the less fit by competition or other lection is higherical quality sustained and aded. The unfortunate variant is like the soldier no advance. Competition is not wholly evil, but surance.

# THE SANTA ANA REGISTER Sharing The Comforts By R. C. Hoiles

"EXCESS SAVINGS"

Senator Sheridan Downey, Democrat from California, certainly has strange ideas as to what causes prosperity. In a recent news dispatch, he infers that there can be an excess of savings, by saying, "For years the academic economists, with a few brave exceptions, have gayly assumed that the savings of the community would always find sound and profitable investments and that progress and prosperity would result. Well, they are

Downey seems to think our trouble is excess savings and he proposes more pensions so that no individual needs to save.

The reason these savings have not found profitable investments is very simple. It is because of the Federal laws that prevent the man who has savings from hiring a man whom he believes is best fitted to help operate the tools represented by these savings. It is not because of the savings that we do not have employment, but it is because of laws that interfere with the proper management of these savings.

Until we realize this, we will continue to have unemployment and as long as the government interferes with the proper management of savings, there naturally will be less incentive for savwith the announcement that a new process has ings. If savings cannot be used to benefit the saver there will be less saving.

Downey seems to have gone back to the Middle Ages and advocates what Manderville advocated This process consists of hanging the meat in in his book, "Private Vices are Public Benefits." temperatures higher than are usually used, and In the Middle Ages, they believed that the rich killing off the resulting bacteria with ultra-violet man's spending benefited the poor. Then Adam radiations. Every grade of beef, it is believed, can Smith came along and pointed out that it was the be raised approximately one full grade of palat- saver who benefited the poor and for 150 years we had progress. Now we are going back to the Middle A good many of the developments of science, Age Policy and following such men as Downey.

### UNIFORM RULE ONLY PROTECTION

Since we have digressed from the uniform rule in collecting taxes to support the government, we have become more and more bewildered. When the government attempted to tax everybody at the same rate, then all the voters were equally interested in having the government do only those things that were necessary; but, when we started the policy of taxing one man at one rate and another at another rate, then those, who were not taxed at as high a rate as some, were not at The speed of passenger trains has been develop- all interested in government economy. # Reason for Industrial Fear

By GUS W. DYER

Professor of Economics and Sociology, Vanderbilt University

chief characteristic is the super protection it gives
to fundamental human rights and to
the essential principles of industrial
stability and industrial progress
against the hazards of majority rule.
This super-Constitutional protection
is the real source of American industrial progress, and has been the effective safeguard of business through fective safeguard of business through

aid or dictation from the go rnment aid or dictation from the government and without any unemployment or relief problem. The depressions of 1873 and 1893 were world-wise extent, but they could not stop American industrial progress, while it was under Constitutional protection. In such case after a brief period of resignature, business of its own strength and of its own initiative came back stronger and more efficient than it stronger and more efficient than it had ever been before. But in all of these depressions busi-

ness had an assurance that dispelled fear and inspired hope and invincible confidence. Through the darkest clouds of the d pression business leaders could always see, just ahead, the solid foundation of Constitutional protection. This supplied the inspira-tion that always brought business

failed for the first time in our history

When this government was estab-lished a century and a half ago we were a rural people, occupying a wild, undeveloped country. We were with-tial foundation? This fear is not imagitial foundation? This fear is not imaginary. It is real and is thoroughly justified by the untoward conditions from which it springs. It cannot be removed by stimulants and narcotics, neither can it be "explained away" by reassuring phrases.

The fear and uncertainty that have

The fear and uncertainty that have that gave full robbed business of its recuperative and effective vitality, and arrested industrial progand effective protection to our inalienable rights against the government. This Constitution was the product of the wisdom of experience. Its chief characterrotection it gives vitality, and arrested industrial progress are due solely to the fact that the present administration has taken from business that super-protection given to the essential principles of industrial stability and industrial progress by the Constitution, and subjected industry to the hazards of mass domination. Industrial stability and industrial progress are impossible under mass dictation, expressed by majority rule. jority rule.

The Chief Executive has made it plain that he does not believe in nor subscribe to the American theory of super-Constitutional protection against the government. He has made it clear that he believes that the will of the majority, regardless of how the all the adverse conditions and experiences of our history.

Business came out of the depressions of 1828, 1837, 1848, 1858, 1873, 1882, 1893 and 1903 without any special aid or dictation from the conditions of the depression of

Anglo-Americans, will assert itself. Washington will soon hear, if it has Why is it, then, that business has not already heard, the sovereign command of this unwritten Constitu-tion that often nods but never fails to come back from a depression? The answer very generally given to this to awaken in a Constitutional crisis, question is that business is held back "impedimenta to the rear!"

# NEWS OF THE WORLD PORTRAYED IN PICTURES

Injunction "Stops" Picketing

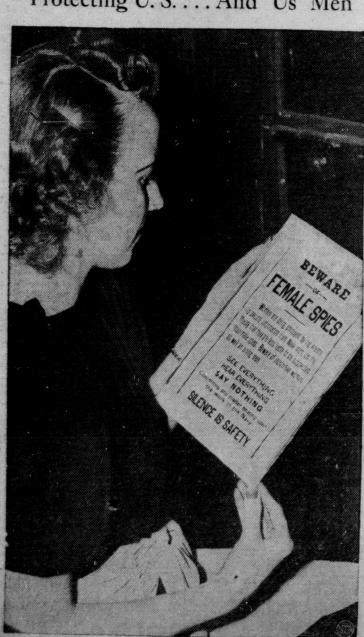

Despite a superior court injunction prohibiting pickets from patrolling Matson docks in San Francisco, a handful of Maritime Federation union pickets still walked up and down in front of the docks and scheduled ship sailings were cancelled. The men are striking against living quarters on the company ships. Above, two union men read a copy of the court order posted on the dock.—Photo by

# "Dance With Tears In Their Eyes"

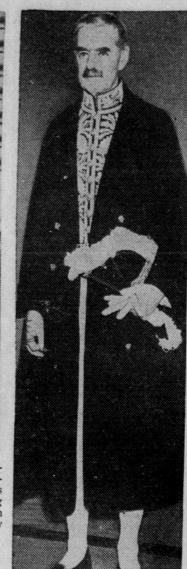

A few hours before Joan was scheduled to receive her divorce decree, Joan Crawford and Franchot Tone dance together in a New York City night club, gaze fondly at each other. Later, in Hollywood, a judge refused to grant Joan a "proxy" divorce.-Acme Tele-

# Protecting U.S.... And Us Men

The sign which Louise Knight holds above, seems to indicate that her sex is more deadly than the male. The poster hangs in a Navy Department office at Washington, as a wary government's warning that the inquisitive girl one takes out tonight may prove to be the "Mata Hari" of tomorrow.

Minus umbrella, top hat, and familiar dark suit, Britain's harried Prime Minister Neville Chamberlain is shown in court costume frills setting out for Buckingham Palace and a social interlude in business of dealing with dictators.

# Silence Costly

Photographer Robert Brown of the Chattanooga, Tenn., News was jailed when he refused to tell a local judge and Grand Jury where he took published pictures of cock-fighting. Charged with contempt of court, Brown declared, "I don't approve of cock-fighting," but insisted he could not break his promise to protect his picture sources.

### Goes to Court Tsk, Tsk, These Maritime Strikers

A prospective passenger for a Matson boat at San Francisco looks pretty bewildered after arriving to find the dock surrounded by pickets. Six Maritime Federation unions are picketing in protest against living quarters on Matson ships.

# All Teamed Up

It's easy to see that Edgar "Abe" Martin, famous cartoonist who draws "Boots and Her Buddies" for NEA Service-Register, has as sharp an eye for beauty in real life as in his popular comic strip. The coterie of comely Akron (Ohio) University coeds encircling him was named the winner in a "Battle of Beauty" against a similar team from Kent State University, which Martin judged.

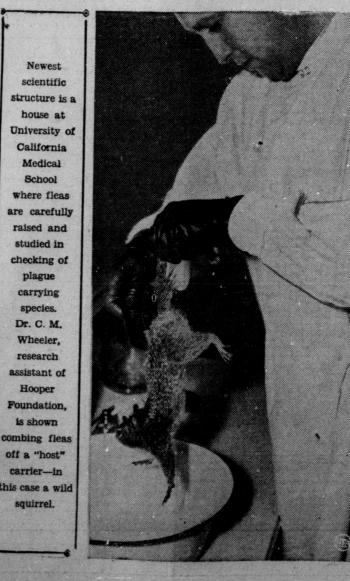

# 'Flea House' Newest in Science

School

carrying species

Joan Crawford, film actress, appears at a Los Angeles notary's office to file a deposition in her divorce proceedings against Franchot Tone, instead of appearing in court

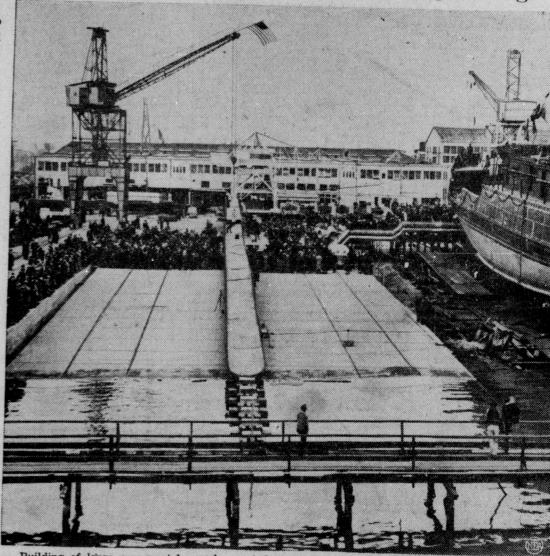

Crew Missing On Chinese Junk "Sea Dragon"

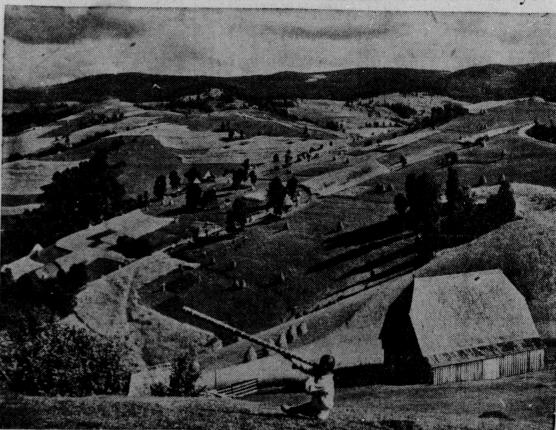

Three members of the crew of the junk Sea Dragon, on a voyage from Hongkong to San Francisco, unreported by radio for several days. Left to right, Capt. John Welch, Richard Halliburton, resident of Laguna Beach, Henry von Fehren, engineer.—Photo by Acme.

# West Coast Gets First Commercial Shipbuilding

Building of large commercial vessels—an industry dormant on the Pacific Coast since 1921—received its first revival when keels were laid at Oakland, Calif., for two 10,000-ton freighters for the Maritime Commission. Further orders are expected by Western shipbuilders. Photo shows one keel-

# Shadows of War Creep Into Rumania's Sunlit Valleys

With Rumania massing her army as a countermove to reported large-scale troop concentrations by Hungary and Bulgaria, Transylvania, a typically beautiful view of whose Apuseni Mountain district is shown above, may become Europe's newest danger spot. World War treaties ceded Transylvania to Rumania, and Hungary has often signified its intention to recover it.

### U. S. Design for War (Depar tment)

As the U. S. government talks armaments, it also talks about a new home for the War Department Vashington. Above is architects' drawing of proposed new war building with 500,000 square feet of
